The Key Features The game engine and physics engine deliver a lifelike experience in which players can change, evolve, and even battle each other. Players can build roads, residences, and entire districts on land and water. The game engine provides hundreds of new buildings. New types of vehicles such as boat, car, bus, and bicycle provide exciting city-wide transportation. A persistent city environment allows players to continue their adventures as they progress. New features include nightlife, adult content, gated communities, new graphical features, and more. The in-game advertisements are displayed only on a user-configurable interval between games so they won't disturb or distract you in the middle of your game. In addition, the ads are useful to make money so you can buy new parts for your vehicles and buildings. The game engine and physics engine are based on the internal engine of City Life. City Life is an industry-recognized mobile social game and is currently played by over 2 million players worldwide. City Life Mobile Social Game and City Life Game Engine Features The in-game advertisements are displayed only on a user-configurable interval between games so they won't disturb or distract you in the middle of your game. The game engine and physics engine are based on the internal engine of City Life. City Life is an industry-recognized mobile social game and is currently played by over 2 million players worldwide. The city development and management simulation game, City Life, is a City Builder game where players create their own city and rule over it for their own amusement and money. The 3D game engine provided by the engine of the game allows the players to build thousands of structures and buildings on land and water, build the city of the future with their own hands, and manage it for survival. As the game progresses, players will have to manage the economical needs and other issues of the city including health, crime, water, economy, industry, and pollution. Players will have the opportunity to manage everything as well as a mayor of the city who stands between the city and its citizens. The features of the game engine include: City Life 82157476af
